(\*) Monochrome definition

(This definition replaces Document 223 and INFO 1991-1912)

A black and white work going from the darkest gray (black) to very light gray (white) is a monochrome work with the different shades of gray.

A black and white work, spinning entirely in one color, will remain as a monochrome work and may appear in the black and white category; this work can be reproduced in black and white in the catalog of a salon under Patrocini FIAP.

Conversely, a black and white work modified by a partial toning or the addition of a color becomes a color (polychrome) work must be listed in the color category; this work needs color reproduction in the catalog of a salon under Patrocini FIAP.

(\*\*) Definition portrait

Photographic portraiture is a genre that brings together a whole series of artistic initiatives that revolve around the idea of showing the physical or emotional qualities of the people who appear in the photographic images.

(\*\*\*) Natural definition

Nature photography is a modality of the broad photographic subject that attempts to frame on paper the grandeur of landscapes, fauna, flora and small details. Nature photography tends to focus your attention on capturing aesthetic aspects, far more than other types of photography, and includes:

Underwater photography

Macro

fauna

flora

landscape

Astrophotography

aerial photography
